

Muhammad Usama Sarwar

Software Engineer | Full Stack Developer (MERN / Next.js)

+92 3019130920 | usamasarwar160492@gmail.com | [Linkedin](#) | [GitHub](#) | [Website](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building production-grade web and mobile applications using Next.js, React, React Native, and Kotlin, backed by a Bachelor's degree in Software Engineering and practical training through bootcamps, a remote internship, and a one-year web & mobile development program. Proven ability to design and ship complete applications end-to-end, from database schema and authentication to deployment, demonstrated through 15+ personal and academic projects, including a Final Year Project that auto-generates production-ready hotel management systems. Strong foundation in DSA/problem-solving, with completed training in leadership (Aspire Leaders Program, Harvard-affiliated) and Generative AI. Seeking to contribute as a Full Stack Software Engineer in a collaborative, growth-oriented team.

TECHNICAL SKILLS

Languages: C++, JavaScript (ES6+), TypeScript, Python, Kotlin, C # (basic Fundamentals)

Frontend: HTML5, CSS3, Bootstrap 5, Material UI, Tailwind CSS, React.js, Next.js, React Native

Backend: Node.js, Express.js, Firebase (Auth & Firestore), Prisma ORM, NextAuth

Databases: MongoDB, PostgreSQL, MySQL, SQLite, Firestore

Tools & Integrations: Git & GitHub, Redux Toolkit, REST APIs, Contentful CMS, OpenSea API, surge, Vercel/Netlify Deployment, Generative AI Fundamentals

EXPERIENCE & TRAINING

Full Stack Development Intern (Remote) — Codex

4 Months | Remote

- Worked on real-world web development tasks as part of a remote engineering team, contributing to frontend and backend features.
- Gained hands-on experience with collaborative development workflows, code reviews, and Git-based version control.

Web & Mobile App Development Program — Saylani Mass IT Training (SMIT)

1 Year | Onsite

- Completed an intensive one-year, industry-oriented curriculum covering full stack web development and mobile app development.
- Built multiple guided and independent projects covering HTML/CSS/JS, React.js, Node.js, and database integration.

Full Stack Development Bootcamp — Techloset Solutions

4 month | Onsite

- Completed a focused bootcamp strengthening practical software engineering and full stack development skills.

EDUCATION

Bachelor of Science in Software Engineering

Government College University, Faisalabad

Session : 2022-2026

CGPA: 3.33 / 4.00 | Completed

FSc Pre-Engineering

Government Graduate College of Science, Faisalabad

Marks: 971 / 1100 | Passing Year: 2022

CERTIFICATIONS

- Online Leadership Course: Aspire Leaders Program, Aspire Institute (Harvard-affiliated faculty) — March 2023

- Generative AI Certificate: Pak Angels
- Software Engineering Bootcamp Certificate: Techloset Solutions
- Web & Mobile App Development Certificate: Saylani Mass IT Training (SMIT)

FEATURED PROJECTS

Smart Hotel Website Auto Generator (Final Year Project | Full Stack Development)

Developed a hotel website generator that creates customized hotel management systems based on selected modules, automatically generating a production-ready Next.js application.

Tech Stack: *Next.js, TypeScript, PostgreSQL, Prisma ORM, NextAuth, Tailwind CSS, Nodemailer*

[GitHub](#) | [Live Demo](#)

URL Shortener (Full Stack Development)

Built a full-stack URL Shortener with secure authentication, custom short links, QR code generation, URL management, and a responsive dashboard.

Tech Stack: *Next.js, TypeScript, Redux Toolkit, MongoDB, Prisma ORM, NextAuth, Tailwind CSS, Nodemailer, QR Code*

[GitHub](#) | [Live Demo](#)

Income Expense Tracker App (Mobile App Development)

Built an offline-first mobile app with secure authentication, category management, income/expense tracking, financial reports, interactive charts, and multi-currency support.

Tech Stack: *React Native, TypeScript, Redux Toolkit, SQLite, React Navigation, AsyncStorage*

[GitHub](#) | [APK file](#)

Smart Notes App (Mobile App Development)

Built a cloud-based note-taking Android app with secure authentication, cloud-synced CRUD operations, note search, timestamps, and notifications using MVVM architecture.

Tech Stack: *Kotlin, Firebase Authentication, Firebase Firestore, MVVM, Material Design, RecyclerView*

[GitHub](#) | [APK file](#)

NFT Marketplace (Frontend Development)

Built a responsive NFT marketplace integrated with the OpenSea API to fetch live NFT collections and metadata, featuring trending collections and auction timers.

Tech Stack: *React, TypeScript, Redux Toolkit, Axios, React Router, Tailwind CSS, OpenSea API*

[GitHub](#) | [Live Demo](#)

10+ additional projects (Car Rental, Eco Store, portfolio sites, e-commerce clones, calculators, utility apps) available on [GitHub](#).

ACHIEVEMENTS

- Independently designed and deployed 16+ web and mobile applications, including full-stack platforms with authentication, and database integration.
- Built a Final Year Project that automates production-ready hotel management website generation using Next.js and Prisma ORM.
- Completed the Aspire Leaders Program, an online leadership course delivered by Harvard-affiliated faculty at the Aspire Institute.
- Solved a growing collection of Data Structures & Algorithms problems on LeetCode, strengthening problem-solving and coding-interview readiness.
- Completed a full one-year, industry-focused Web & Mobile App Development program at SMIT alongside a remote internship and specialized bootcamp.
